

A. Plots of these rank probability (Rankograms)

B. Plots of cumulative ranking probability (SUCRA)

Appendix figure1. Plots for ranking probability of different dosing of GLP-1s on impact of SBP, DBP, heart rate and hypertension.

Note: SU: sulphonylureas; TZD:thiazolidinedione. Ranking: probability of being the best treatment, of being the second best, the third best and so on, among the 12 comparisons. SUCRA:surface under the cumulative ranking curve.
